CAREER OBJECTIVE:

Motivated engineering student aiming for AI Security Full Stack roles, with hands-on work in full-stack apps, machine learning, and security tools. Ready to bring strong problem-solving, steady project delivery, and a passion for secure, scalable systems to a forward-thinking team.

EDUCATION:

B.Tech in Computer Science & Engineering(Artificial Intelligence) 07/2024-Present
Pydah college of engineering *kakinada*
CGPA:8.2/10.0

Intermediate 06/2022-05/2024
Govt.junior college *kakinada*
percentage:73.7%

TECHINICAL SKILLS:

Languages:

C,Java,Python,JavaScript,SQL

Backend:

node.js and python

AI and ML:

Gen AI and open API

Frontend:

HTML,CSS,REACT,NEXT.JS

Database:

Firebase and Mongodb

Tools & Platforms:

Git,Github,Firebase

ARCHIVEMENTS:

- SRUJANA 2K26 Hackathon Participation
- CODESTROM S2 2nd place
- Inter college Debugging compitation winner
- Konaseema Hackathon Participation

PROJECTS:

- **Nuroliq AI:**
 - Deep learning web app for MRI classification using EfficientNetB0 transfer Learning
 - Built with TensorFlow and flask backend and with HTML,CSS,JS Frontend
- **Sign language To Text language conversion webapp:**
 - Real Time webapp that converts sign Language Gestures to Readable Text
 - Built using computer Vision and Deep Learning for gesture recognition
 - Aimed to improving accessibility and communication for Hearning-Impaired community
- **Phishing Links detection System:**
 - Built a machine learning based system to detect Phishing URLs in real time
 - developed and chrome extesion that warns instantly when visiting the suspicious or malicious links
 - Trained on large phishing datasets using Classification algorithms for high accuracy

CERTIFICATIONS:

- Full stack development using python from eduskills
- ethical hacking for eduskills
- Java from udemy
- python from hackerrank
